Manufacturer: Atomstack

Name: Atomstack

Type of machine: Desktop laser engraving and cutting machine.

Specification

- Laser Power: 5W (5000mW)
- Laser Wavelength: 405nm
- Working Area: 40cm x 40cm
- Engraving Accuracy: 0.01mm
- Engraving Speed: 0.02-0.2 seconds per pixel
- Supported Materials: Wood, leather, acrylic, paper, cardboard, bamboo, rubber, and other non-metallic materials
- Compatible File Formats: BMP, JPG, PNG, DXF, etc.
- Software Compatibility: Windows XP/7/8/10 and Mac OS
- Operating Voltage: AC 110-220V
- Operating Temperature: 0-45°C
- Machine Size: 38cm x 28cm x 14cm
- Net Weight: 3.5kg

Description:

- Safety features: The machine has several safety features, including a built-in gyroscope, which automatically stops the laser if the machine is moved or tilted during operation. It also has an air cooling system, which helps to prevent the laser from overheating and causing damage.
- Multiple operating modes: The machine has several operating modes, including drawing, engraving, and cutting modes. Users can select the appropriate mode for the material they are working with, which helps to optimize results.
